

LIKELY FORESEEABLE IMPACTS / EFFECTS

- Changes in air temperature (increase/decrease)
- Oceanic changes
 - o Sea-level rise
 - o Changes in circulation patterns
 - o Increase in ocean temperature
 - o Changes in seawater chemistry, nutrient levels
- Terrestrial surface water changes
 - o Changes in seasonal flow regimes and volumes
 - o Nutrient levels
 - o Freshwater chemistry, temperature
- Seasonal shift / variation
- Precipitation changes
- Weather extremes and storm events
- Wind variability (pattern/intensity)
